(m) (14)(C) The bag and possession limit for king salmon 20 inches or greater in length is two fish; a king salmon 20 inches or greater in length that is removed from the water must be retained and becomes a part of the bag limit of the person that originally hooked the fish; a person may not remove a king salmon from the water before releasing the fish;

(m)(14)(E) after taking and retaining two king salmon 20 inches or greater in length, a person may not sport fish for any species of salmon that same day in waters open to king salmon fishing.

Commissioner

By delegation to:

Matthew G. Miller
Area Management Biologist

JUSTIFICATION:

A steam survey conducted in Ship Creek on June 26 enumerated 2,200 king salmon upstream of the designated harvest area below the Knik Arm Power Plant dam. This escapement exceeds the hatchery's brood stock goals and natural spawning requirements for Ship Creek. Therefore, it is warranted to increase the king salmon bag and possession limit in the Ship Creek fishery to allow for increased harvest of surplus hatchery fish.
